Tools necessary:
T25 Torx
Thread locker

①

②

Add thread locker to the tip area of each screw. Arrange side stand foot in place. Start the two screws closest to the bike (at the tips of the upper plate) by hand. Then place and start the rest of the screws but do not fully tighten yet.

Snug each screw tight in turn. These should be just tight enough that the tips of the screws sit flush with the underside of the bottom plate. There will still be a gap between the plates when installation is finished.

CONGRATULATIONS!

You've completed your installation. If at any point you have questions about your installation or have any feed back for us, we'd love to hear it. A downloadable version of these instructions can be found at our web site. www.AltRider.com

After 5 hours or 100 miles of riding, check your newly installed equipment to ensure all hardware is secure.
