MADE IN THE USA

**Tools necessary:**

- ① 8mm hex tool
- ② 17mm socket or box wrench
- ③ grease (not provided)

**Kit:**

- ① (2) M10 x 60 socket head cap fasteners
- ② (2) bushings
- ③ (4) M10 washers
- ④ (2) M10 nylon locking nuts
- ⑤ (2) stainless steel springs
- ⑥ center stand

- ① Push out the rubber plugs currently in the center stand mounts.

- ② Grease the two aluminum bushings inside and outside. Slide them in to the mounts on both sides. Use enough grease so that it will hold the bushings in place.

- ③ Hook the springs on to the two holes of the metal tab. Let the center stand hang here.

- ④ Set the position of the right mounting tab as shown above then proceed to step 5.

- ⑤ Have your fasteners accessible. Using the frame and right mount as a leverage point, push the left side mounting tab up to align it with the left mount on the bike. Both mounting positions are to the RIGHT of the mounts.

- ⑥ Insert both of the M10 x 60 hex cap bolts with the washers positioned as shown above. Sliding the bolts into place will hold the center stand in position. After both bolts are in place, slide one of the washers over the threaded end of each bolt.

- ⑦ Using a 17mm socket and a 8mm hex driver, tighten the bolts into the nylon locking nuts to secure the stand. DO NOT OVER TIGHTEN, you need to leave enough play so that the center stand can move freely. Tighten to 41 nm and then test the action.
