Polycarbonate Headlight Guard Cleaning Instructions

Clean your headlight guard using **ONLY** mild soap and water, dry with a soft cloth. For particularly stubborn bug guts, remove and soak in water, or place a wet soft towel on the lenses and allow to soften the debris.

DO NOT USE OTHER CHEMICALS to clean your headlight guard, such as windex, rubbing alcohol, acetone, simple green, ammonia, bike wash etc.

The polycarbonate plastic lenses are very tough and impact resistant, but will break down over time when exposed to harsh chemicals.

- ① Assemble polycarbonate lens to stainless frames. Peel protective film back from polycarbonate lenses. Use T10 torx and 5.5mm nut driver to attach lenses to frames. Place M3 torx screws and washer against polycarbonate, and with M3 locknut on back side against stainless steel frame.

- ② Use 12mm socket to loosen one of the hex screws that holds the headlamp in place. Do not remove all the way. (TIP! this will be easier if you have a friend to help hold the headlamp in place).

- ③ Loosen the screw on the other side and remove completely. Careful not to lose any spacers or washers (varies by model).

- ④ (A) Install one arm of the AltRider headlight guard with the screw you just removed. Leave this screw loose for now. (B) Then completely unscrew the first side and finish the installation of the headlight guard. Tighten both screws. Check headlamp aim in accordance with manufacturer's instructions.

CONGRATULATIONS!

You've completed your installation. If at any point you have questions about your installation or have any feed back for us, we'd love to hear it. A downloadable version of these instructions can be found at our web site. www.AltRider.com

After 5 hours of riding, or 100 miles, check all the fasteners on the assembly to ensure they are tightened to spec.
