MADE IN THE USA

Kit:

- ① paper instructions (in english)
- ② M12 engine bolt
- ③ (2) billet aluminum Frame Slider Mounts
- ④ (2) frame sliders
- ⑤ (2) billet aluminum inserts
- ⑥ (2) M12 locking nuts
- ⑦ (2) Aluminum spacers (for 650 only)

Recommended tools:

- ① (2) 1/2" ratchets
- ② (2) medium or long extensions
- ③ (2) 17mm sockets
- ④ (2) 18mm sockets
- ⑤ 1/2" torque wrench

- ① Using (2) 17mm sockets w/ratchets, remove the AltRider provided through bolt from the Crash Bars' frame mount.

- ③ Insert the assembly through the crash bars' frame mount as shown above. Push this whole assembly through until the frame slider is seated firmly in the crash bars.

If you are installing crash bars at the same time as frame sliders, refer to the crash bars install instructions first.

- ② Assemble as shown. Tighten the M12 locking nut with an 18mm socket so that just one thread is showing past the top of the nut. Use the spacers shown above for the DL650. Spacers not needed for the DL1000.

- ④ Now assemble the second side of the frame sliders as shown. Using (2) 18mm sockets w/extensions, tighten both sides down. Use the torque wrench to tighten both sides to 60Nm. (spacer not needed for the DL1000)

CONGRATULATIONS!

You've completed your installation. If at any point you have questions about your installation or have any feed back for us, we'd love to hear it. A downloadable version of these instructions can be found at our web site. www.AltRider.com

After 5 hours or 100 miles of riding, check your newly installed equipment to ensure all hardware is secure.
